

JASWANTH BANDLA

PRODUCT MANAGER | AI PRODUCT MANAGEMENT

Andhra Pradesh, India | [8555820670](tel:8555820670) | jaswanthbandla06@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science graduate moving into product management, with three self-built products that each went from a blank problem statement to a working prototype — PRD, user flows, and success metrics included — across fintech, wellness, and AI. Currently works in home loan sales, which is where the idea for Vision Pay actually came from: customers kept getting stuck on the same repayment and paperwork questions, and that gap became the product. Comfortable owning a problem from first conversation through to a shipped prototype, and looking to bring that process to a product team full-time.

CORE SKILLS

Product Strategy • Product Discovery • User Research • PRD Writing • JTBD • MVP Prioritization • UX Flows • Roadmapping • Product Metrics & Analytics • Agile/Scrum • AI Product Design

Tools: Jira • Figma • Confluence • SQL • Amplitude • Mixpanel • Notion • ChatGPT

PRODUCT MANAGEMENT PROJECTS

AERIS — AI-Powered Product Management Platform *Independent Product Project | 2026*

- Started with a blank page, so the first real task was picking a problem worth solving and defining who it was actually for. Direct user interviews weren't feasible here, so the problem and feature set were validated through independent market and requirement research instead — then wrote the PRD, mapped the user flows, and set metrics that would show whether it was working.
- Built a working web prototype instead of stopping at slides, and wrote up the full decision process as a case study so the reasoning behind each choice is visible.

NOURA — AI-Powered Personalized Wellness & Healthy Food Platform *Independent Product Project | 2026*

- Built around personalization rather than just tracking numbers, grounded in firsthand experience with the same wellness and food-planning challenges the product addresses — used that as the primary lens for how recommendations and progress tracking should adapt as habits change.
- Set clear boundaries for where the AI could make a call on its own versus where it shouldn't, then built a responsive prototype to test whether the experience felt personal instead of generic.

VISION PAY — Unified Loan & Repayment Management *Independent Product Project | 2026*

- Came directly out of firsthand experience with loan repayment confusion — the same customer problem seen in the day job — around what's owed, when, and why. Mapped that into five stages (Verify → Discover → Understand → Pay → Track) instead of designing a generic loan app.
- Built personas, competitive analysis, the full PRD, and UX flows around that structure, then shipped a working prototype so the flow could actually be tested rather than just described.

PROFESSIONAL EXPERIENCE

SRG Housing Finance Pvt. Ltd. | Relationship Manager – Home Loans & LAP

Jul 2026 – Present

- Generate around 20 Home Loan and LAP leads a month, converting roughly 10 to loan login and 5–6 through to disbursal — covering the full cycle from first contact through eligibility checks and document collection.
- Consistently meet the ₹30L monthly disbursal target and regularly exceed it, with several months reaching ₹60–90L, while coordinating across credit, legal, technical, and operations teams to keep applications moving.

Sasvitha Home Finance Pvt. Ltd. | Sales Officer – Home Loans & LAP

Apr 2026 – Jul 2026

- Generated around 15 leads a month, converting roughly 9 to loan login and contributing ₹50–80L in loan value, while explaining eligibility, documentation, and repayment terms to customers who usually found all three confusing.
- Coordinated with credit, legal, and technical teams to keep cases moving instead of stalling, which came down to resolving conflicting requirements between departments.

Tyger Home Finance Pvt. Ltd. | Relationship Manager – Home Loans & LAP

Jul 2025 – Mar 2026

- First role in the industry — generated around 13 leads a month, converting roughly 7 to loan login and contributing ₹30–70L in loan value while learning the end-to-end HL/LAP process.
- Handled KYC, income, and property verification directly, and worked with credit and operations to hit monthly targets from first enquiry through to final paperwork.
